Profile

Customer-focused billing and support professional with years of experience in the web hosting and SaaS space, comfortable handling everything from live chat conversations to behind-the-scenes account reconciliation. Adept at managing the full billing cycle; invoicing, payment confirmation, and discrepancy resolution, using tools like WHMCS and Zendesk across live chat, email, and phone channels. Combines hands-on customer service instincts with a technical eye for detail, allowing for quicker, more accurate troubleshooting on both billing and account issues.

Experience

BILLING SUPPORT | HOST AFRICA (GO54) | APRIL 2024 – PRESENT

- Managed customer billing queries, resolving **90%** of discrepancies within 24 hours.
- Controlled the billing process end-to-end: raising invoices for new sign-ups and renewals, matching payments against bank feeds and gateway confirmations, sending receipts, and correcting errors with credit memos when needed.
- Maintained accounts receivable and automated hosting plan operations via WHMCS.
- Enhanced account setup accuracy, reducing client onboarding errors by **30%**.
- Ran day-to-day operations in WHMCS and Zendesk, logging and tracking tickets through to resolution and keeping internal documentation up to date.
- Kept an eye on renewal dates, so accounts didn't lapse, and made manual adjustments to client balances whenever corrections were needed.
- Supported technical troubleshooting and collaborated with the Dev team to improve billing flow.

QA ENGINEER | SKILL2RURAL BOOTCAMP (AFRICA & UK) | APRIL 2024 – DEC 2024

- Tested the bootcamp's LMS platform end-to-end, covering both new features and regression scenarios using Cypress.
- Checked that content rolled out correctly and that the user experience held up across mobile and desktop.
- Dug into edge cases and unlikely user paths that others might have missed, which fed into a 60% bump in release quality.

QA ANALYST (TRANSACTION MONITORING) | COURTEVILLE BUSINESS SOLUTIONS PLC | AUG 2019 – JUN 2023

- Monitored transactions across five states on the Autoreg Platform,
- helping cut fraudulent activity by roughly 80%.
- Introduced clearer, more visual reporting that sped up decision-making by about 50%.
- Checked transactional data for accuracy and completeness as part of the broader effort to catch suspicious or unusual activity.
- Worked closely with the dev team on system upgrades that pushed reconciliation accuracy up by 85%.

Education

B.SC. IN BUSINESS ADMINISTRATION | UNIVERSITY OF LAGOS | 2020 - 2025

DIPLOMA IN BUSINESS ADMINISTRATION | KWARA STATE POLYTECHNIC | 2016 - 2018
